WATERPROOFING & INSULATION

OUR SERVICES

Four Links Combo Roofing System

The Combo roofing system that provides waterproofing and thermal properties is certified as system from Dubai Municipality. The sprayed applied polyurethane foam is certified from Dubai central laboratories

Water proofing Membrane

A Waterproofing membrane is a thin layer of water-tight material that is laid over a surface. This layer is continuous and does not allow water to pass through it.

Wet area

The rooms or spaces containing sanitary fixtures and appliances including bathrooms and en suites, toilets, laundries, kitchens, entries and garages. They are subject to high levels of moisture from direct wetting. In wet area we are providing various kinds waterproofing like Cementitious Waterproofing , polyurethane waterproofing , sbs modified membrane waterproofing.

Warehouse & Metal Roofing

metal roof waterproofing system is an envelope system for your Factory and Warehouse etc...

EPOXY

Epoxy is a type of resin adhesive / membrane that dries hard, shiny, and smooth. Applying several coats of this can result in a waterproof or water-resistant surface. Mainly Epoxy coating is applying in Car parking area, Garages , food storage area etc..

GRP LINING

Fibre glass lining is being recommended for RCC tanks , swimming pool Drainage, Manholes, and mild steel tanks, whatever shape, size, depth or design. GRP lining helps to resist the formation of moulds, bacteria, algae and fungi

Crack Injection

Crack injection is the process of forcing a fluid resin into a void in a foundation wall , in this context we are referring to a crack in the foundation or any poured concrete structure.

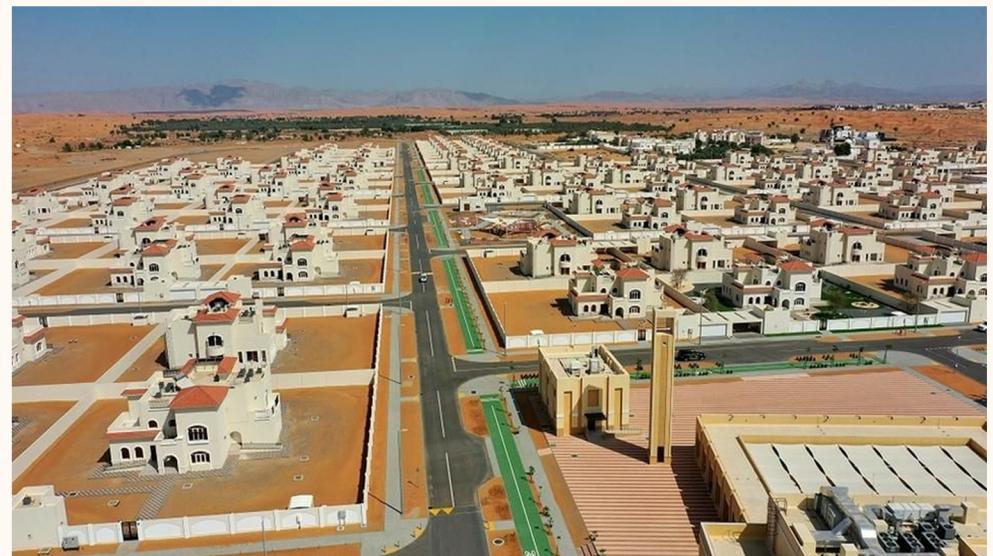

Water Tanks & Swimming Pools

The system is waterproofed by a water resistant layer. This layer is applied on the water side of the wall, e.g. inside the swimming pool. ... In a pool the water resistant layer is easily accessible when the water is pumped out of the tank.
